Fluid Power Educational Foundation Receives Large Donation

Cherry Hill, New Jersey (January 15, 2012) - The Fluid Power Educational Foundation (FPEF) is pleased to announce a \$150,000 donation from The Mackey Foundation, in memory of Bruce B. Mackey. This donation will allow the FPEF Board of Trustees to commit to an increase in scholarship monies to students attending FPEF Key Schools, institutions that have concentrated fluid power programs, beginning with the 2013 school year.

Bruce B. Mackey (1924-2010) founded Main Manufacturing Products, a hydraulic flange manufacturer in 1959 in Grand Blanc, Michigan. Mr. Mackey was a fluid power instructor in the 1960s and 1970s and was a dedicated proponent of fluid power education.

"The Educational Foundation is extremely pleased to have been given this bequest. In these trying economic times, fundraising for an organization such as ours is quite a challenge. It is gratifying to be remembered by long-time industry leaders and friends of Fluid Power Education," said Liz Rehfus, Liz Rehfus, CFPE, CFPS, FPEF Chair

About the FPEF

The Fluid Power Educational Foundation (FPEF) was formed in 1982 to stimulate, advance and support the sciences and technologies of hydraulics and pneumatics in North America. In pursuit of this purpose, the Foundation supports education and research initiatives that provide meaningful impact to the advancement of the fluid power industry. The Foundation is wholly supported by fluid power industry individuals, firms and associations, which enable FPEF to bring fluid power to students of all grade levels. Additional information can be found by contacting FPEF at 856-424-8998 or by visiting www.fpef.org.
